H. PETIT & Cie

■ MAIN PRODUCTS

Complete range of covering spindles from speeds of 7,000 to 27,000 rpm for a net thread weight of 400g to 2,000g.

Possibility of creating a specific model depending on the particular use by the customer.

■ APPLICATION FIELDS

Covering, double twist and Texturing.

■ SERVICES OFFERED

The spindles made by H. Petit & Cie are suitable for either new machines or for replacing existing equipment.

We also renovate and modernize machinery by improving the spindle environment on old machines.

An important stock of accessories designed for down-twisting, double twist, covering and texturing machinery (ceramic thread-guides, belts, rollers and rolling bearings, etc.).

Making specific parts according to the customers' specifications sheet.

All the Company services are covered by ISO 9001 Standard certification.

■ SALES ORGANIZATION

Sales management on the Aubenas site.

Agents in America, Spain, Morocco, Algeria, Turkey and Romania.
